

MOSQUITO CONTROL SERVICE REQUEST

HOW TO REQUEST SERVICES

Mosquito control services are being monitored thanks in part to a grant received by the Ohio EPA. In the Village of Middlefield, these services include truck sprays, hand sprays (localized back pack ULV and Barrier treatments), larvicide applications, and domestic inspections.

Requests for services can be submitted online, in person, by mail or fax to: Village of Middlefield Streets Department at 14860 North State Ave, PO Box 1019, Middlefield, Ohio 44062. Phone: 440.632.5248; Fax: 440.632.0591; email lgambosi@middlefieldohio.com.

When breeding areas are known, larviciding is the most efficient ways to control mosquitoes. For adults biting in the evening, truck sprays provide the most efficient control. Daytime-biting mosquitoes are best treated by hand sprays. The Village will apply barrier spraying the backyards, when requested by property owners op to (4) four treatments per season with backpack sprayers. For additional information, visit the mosquito control page on our website at: www.middlefieldohio.com

Village of Middlefield Residents: All services are provided at no charge. All services require a proper service request to be completed before the request will be scheduled.

No-Spray Exemption: Residents may request to have their address not sprayed during normal operations. Please contact the Village of Middlefield regarding this exemption.

The Village of Middlefield Streets & Utilities Department has the responsibility to determine timing, method and area of treatment, if any, to satisfy requests. These decisions are based on, but not limited to; mosquito surveillance data, best management practices, weather conditions, and legal requirements.

When placing a service request, please be prepared to provide the following information to assist our technicians in responding to your request:

Name

Address

Home and/or work/cell telephone number

Description of problem
