

How much would you pay to prevent a heart attack?

A simple, noninvasive screening called coronary artery calcium scoring can help determine your risk for a heart attack. University Hospitals is pleased to be the only health system in Ohio offering this test to our patients at no cost.

This X-ray test only takes 5 to 10 minutes to complete and measures the amount of calcium that has accumulated in the walls of the coronary arteries. The resulting score can help inform your prevention or treatment plan.

Schedule your **no cost** calcium score test today.

Visit **UHhospitals.org/CalciumTest** to learn more or call **1-866-579-6825** to schedule your screening. A doctor's order is required prior to the test.
